Education

CPU Business and Information Technology College

Bachelor of Science in **Computer Science**.

Skills & abilities

- Strong proficiency in front-end development using React.js, Next.js.
- Proficient in TypeScript and JavaScript (ES6+) for building scalable web applications.
- Solid understanding of modern JavaScript (ES6+).
- Experience in RESTful API design with working knowledge of GraphQL.
- Knowledgeable in authentication, authorization, and web security best practices.
- Experienced with Docker and Kubernetes for containerization and orchestration.
- Ability to write clean, maintainable, and reusable code.
- Back-end development knowledge using Node.js and Express.js.
- Hands-on experience with Prisma and Drizzle ORM and PostgreSQL/MySQL databases.
- Skilled in Tailwind CSS and modern responsive UI development.
- Version control experience with Git and GitHub workflows.
- Knowledge of package managers like npm and yarn.
- Familiarity with responsive and mobile-first web design principles.
- Understanding of JSON, HTTP methods, and API debugging tools.
- Experience working with state management tools like Zustand, Redux and Context API.
- Knowledge of cloud deployment concepts like AWS, Vercel, Render and Netlify.
- Programming Languages: Python, Java, JavaScript, Kotlin, HTML/CSS.
- Strong problem-solving skills and ability to debug issues efficiently.
- Excellent written and verbal communication.
- High attention to detail and integrity in handling sensitive personal data.

Projects

<https://github.com/musegit88>

<https://m4dev.pro.et>

Companion

- The application is built using Next.js, integrates the Meta LLaMA-2-70b-chat model for conversational AI, and utilizes various other modern tools and services.
- Interactive Chat Interface: Engage in conversations with an advanced AI model.
- Technologies Used: Next.js, PostgreSQL, Prisma ORM, Stripe, Open AI Text-embedding, Supabase vector database.

PRIME AI

- All in one AI application that includes Chat-bot, Image generation, Video generation, Music generation and Code generation.
- SaaS with payment system included.
- Technologies Used: Next.js, Open AI Api.

TicketPass

- TicketPass is a web application designed to sell both free and paid tickets for educational events. Built with modern tech stack, it provides a seamless user experience for event organizers and attendees.
- Ticketpass allows users to create, manage, and sell tickets for educational events.
- Technologies Used: ReactJS, NextJS, TypeScript, MongoDB, Prisma ORM, Stripe.
